

## Surgery/Dental Release Form

Owner: \_\_\_\_\_ Patient: \_\_\_\_\_ Procedure: \_\_\_\_\_

**Please read carefully and sign:** If your pet requires anesthesia we recommend a blood profile to reduce any risk and to check your pet's health prior to performing the procedure. These tests are similar to those that your physician would run if you were to undergo anesthesia. Test results will also serve as future reference values should your pet become ill. **Please note that all pets will spend the night after their surgery unless cleared by a veterinarian for same day pick up.**

**Please choose an option in each section below that you would like to have done while your pet is here:**

**Pet Health Screen (CBC & Chemistry Panel)**

This is a series of tests that check the kidney and liver function, blood sugar and protein, as well as the white and red blood cell count and platelet count of your pet. **The additional cost is \$77.50 per pet.**

- (  ) YES  
(  ) NO

**Post-Op Medication:**

This is an injection administered to your pet after surgery that lasts 24 to 48 hours for pain and is highly recommended with any surgical procedure. **The additional cost is \$20 per pet. This is a REQUIREMENT for Ear Crops and Declaws.**

- (  ) YES  
(  ) NO

**Vaccinations:**

Your pet must be current on **ALL** vaccinations to be admitted for surgery. If your pet is not current it will be vaccinated at your expense. If your pet is not fully vaccinated or not old enough to be fully vaccinated there is a potential risk of them contracting an illness such as kennel cough or parvo. **Please mark ONLY the vaccines NEEDED.**

Rabies: (  ) DHLPP/C: (  ) Influenza: (  ) Bordatella: (  ) FVRCP: (  )

**Additional Services:**

Heartworm Test: (  ) Fecal: (  ) Express Anal Glands: (  ) Check Ears: (  ) Check Skin: (  )  
Toe Nail Trim: (  ) Other: \_\_\_\_\_

**If your pet is undergoing a dental procedure and extractions are necessary, there will be an additional charge depending on the difficulty of the extraction.**

**\*Any pets with fleas will be treated at the cost of the owner.**

I assume full financial responsibility for the animal and understand the potential risks associated with anesthesia and surgery.

## **Ear Crop Policy**

Ear cropping is an elective, non-essential, cosmetic, medical procedure. This surgical Procedure is performed under general anesthesia using sterile surgical instruments. There is no guarantee that the ears will be perfect and the results are subjective.

Please keep in mind that every attempt is made to get the ears to stand erect. However, not every dog's ears will stand erect. Sometimes one ear will flop and in some cases both ears will flop, due to a variety of reasons. It is our policy to rack the ears on certain breeds and not on others. The ears can be racked or re-shaped immediately after the surgery or once the incision has healed depending on the breed of dog and/or the appearance of the ears post-operative.

Again, there is no guarantee that the ears will stand. If the conditions are not acceptable with you we will not do the ear procedure.

(  ) I **do** accept the conditions.

(  ) I **do NOT** accept these conditions.

1.

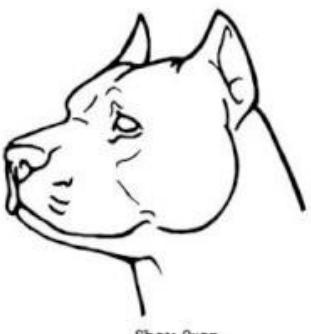

Battle Crop

2.

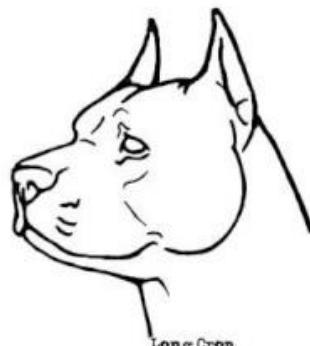

Short Crop

3.

Show Crop

4.

Long Crop

Please Pick (  ) the crop you would like for your dog.
